

PIR sensor switch

Manual& Installation

Feature

- Delay time is adjustable by switch
- Light sensor is optional by switch
- Small size with 140 degree large detecting angle;

Specification

Voltage: 5V/12V/24V

Max load: 5V20W、12/24V60W

Detecting range: 0.2-3m

Delay time: 30s 90s 300s

Function:

When there is motion light on, when no motion detected light off within a delay time

Size

R37mm

15mm

○ Motion sensor on

◐ Motion sensor and light sensor on

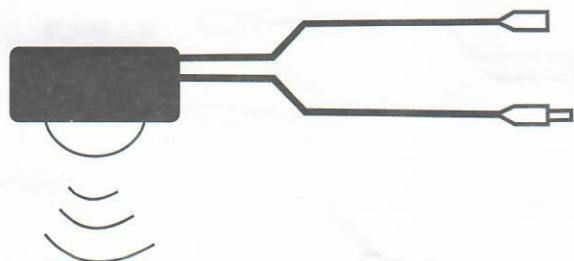

Delay time

I : 30s

II : 90s

III: 300s

Installation

Place sensor directly to motion range of people
Light will on when detect motion , light off when
there is no motion detected within a delay time;

RoHS CE
